ABOUT THE COURSE

The NBFC Products and Services course is crucial for B. Com and BBA students in Tamil Nadu, given the growing role of Non-Banking Financial Companies (NBFCs) in India's financial ecosystem. NBFCs offer diverse financial products, including loans, credit facilities, and investment advisory, which require skilled professionals to manage and promote. This 45-hour skilling course equips students with knowledge of NBFC operations, regulatory frameworks, and customer engagement strategies. It addresses the industry's demand for workforce adept in financial analysis and product management, ensuring that students are job-ready for roles in the NBFC sector, contributing to Tamil Nadu's economic growth and financial inclusion efforts.

COURSE NAME:	NBFC Products and Services
TOTAL DURATION:	45 Hrs
MODE OF DELIVERY	PHYSICAL CLASSROOM TRAINING AT RESPECTIVE
	COLLEGES
TRAINER TO	1:50
STUDENT RATIO:	
TOTAL MARKS:	75

	Table 1			
OVERALL	1. Master Regulatory Compliance in NBFC Operations			
COURSE	2. Build Expertise in Investment Strategies Using NBFC			
OBJECTIVE:	Products.			
	3. Foster Proficiency in Digital Payment Systems and			
	FinTech Solutions.			
	4. Develop Advanced Tax Planning and Compliance Skills.			
	5. Enhance Analytical and Problem-Solving Skills Through			
	Case Studies.			
LEARNING	1. Analyse regulatory requirements and evaluate their			
OUTCOME:	implications on NBFC operations.			
	2. Evaluate different NBFC financial products and assess			
	their suitability for varying client needs.			

- 3. Create secure and user-friendly payment gateway prototypes using Blockchain and SaaS technologies.
- 4. Design comprehensive tax-saving plans for diverse financial profiles.
- 5. Present comprehensive reports with actionable insights, supported by data and analysis.

TABLE 2: MODULE-WISE COURSE CONTENT AND LEARNING OUTCOME

SL.NO	MODULE NAME	MODULE CONTENT	MODULE LEARNING OUTCOME	DURATION (HRS)
1	BFSI Architecture	The BFSI (Banking, Financial Services, and Insurance) sector has unique architectural requirements due to its sensitive nature and regulatory environment. This module delves into the BFSI architecture, emphasizing regulatory compliance, particularly in Know Your Customer (KYC) and Anti-Money Laundering (AML) aspects.	Analyse regulatory documents to identify compliance gaps and create action plans for AML audit scenarios.	9 Hrs
2	Investing in Mutual Fund	This module equips students with the knowledge and skills to create personalized investment	Evaluate mutual funds using metrics like Sharpe ratio and NAV trends to design optimized investment	9 Hrs

	1	16.11		
		portfolios for clients using mutual funds. Students will learn to assess risk tolerance, differentiate funds based on risk quotient, and operate digital intermediary platforms.	strategies for diverse clients.	
3	Investing in Capital Marketing	This module empowers students to invest confidently in capital markets. Students will learn to create a DMAT account, navigate live markets, and execute intraday or long-term investment strategies. They will also develop skills to interpret market trends and build personalized portfolios	Analyse market trends and investor psychology to design personalized trading strategies using technical and fundamental analysis.	9 Hrs
4	Income Tax and GST for Securities	This module equips students with the knowledge and skills to file taxes and GST returns for various entities, troubleshoot errors, and resolve queries during	Evaluate tax liabilities across securities to optimize tax savings and troubleshoot compliance errors through strategic interventions.	9 Hrs

5	NBFC – Technical Analysis & Digital Payment	registration or filing. This module delves into the technical aspects of Non-Banking Financial Companies (NBFCs) and digital payments, focusing on solutioning using Software as a Service (SAAS), Blockchain, and wireframing for fintech product development.	Design fintech solutions integrating Blockchain and SAAS technologies for enhanced NBFC service delivery.	9 Hrs

a) Automated investment advice (robo-advisors)
b) Algorithmic trading strategies (trend following, mean reversion)
c) Artificial intelligence and machine learning applications
d) Benefits and risks of robo- advisory and algorithmic trading

(PROJECTS THAT COMPREHENSIVELY COVER ALL THE LEARNING					
	OUTCOME)				
SL.NO	FINAL PROJECT				
1	Evaluate challenges in digital Demat account processes and design a				
_	user-friendly interface using wireframing.				
	You are an operations head in a broking company, please Derive a				
2	detailed document list for Demat and Trading account opening for an				
	Entity (proprietary account or Partnership firm)				
3	analyse AML case studies to propose innovative fraud detection				
	frameworks leveraging AI tools.				
4	When a person is faced with a personal injury accident, prepare a				
_	process to register the claim for his accident insurance				
	Prepare a SIP plan in Mutual Fund for a client at the age of 38 with a				
5	salary of Rs.1,20,000/- per month, whose short-term goal of 10				
]	years to clear his home loan of 48 Lakhs and also a long-term goal of				
	20 years to have a corpus of 1 Crore				
6	You as mutual advisor, please prepare a question bank to explore				
	the risk profile of a client				
7	Prepare a performance report or a peer analysis based on any 2 AMC				
,	in the Hybrid fund's category using the amfindia.				
8	Download a factsheet of an equity fund of any AMC and prepare a				
0	report on the basic and mandatory requirements in a factsheet				
	Please download the latest quarterly report of any FMCG sector				
9	large-cap company listed and prepare a 2-pager key highlight of the				
	company performance to submit to your client				
10	Prepare a 1-pager technical analysis report on your favourite stock				
10	listed under the Nifty 50 index				
11	Prepare a process to place a Stop loss order on a long position based				
11	on your technical analysis				
12	Prepare an analysis report on the Nifty50 index such as the list of				
12	stocks, the sectors they belong, and also weightage of each stock				
10	Create a capital gain tax calculator for STCG and LTCG for an				
13	individual using Excel 14				

14	Prepare a process to become a SEBI registered Research Analyst to
14	start your own robo-advisory firm
	Mr Arjun's father is getting a retirement benefit of Rs 62 lakhs, do a
15	risk-return analysis and come out with a solution for a probable
	investment allocation
16	Develop a Systematic Investment Plan (SIP) calculator that allows
10	users to determine the investment amount and frequency
17	Implement a trading system using NSMART that enables users to
17	place orders, buy/sell shares, and explore various functionalities
18	Develop an algorithmic trading platform that utilizes AI-based
10	strategies and incorporates risk management techniques
19	Analyze emerging trends and technologies in the Indian FinTech
	sector and present a comprehensive overview
20	Build a dashboard that tracks the performance of selected mutual
20	funds and provides alerts for portfolio rebalancing
